

Date: August 2026

The **Jan-Yojana AI Hub** empowers Indian citizens to automatically discover, match, and apply for Central and State government schemes (e.g., PM-KISAN, PM Jan Dhan, ABHA Card, Ayushman Bharat, Ladli Behna, Jyotirao Phule Jan Arogya). Schemes are auto-ingested and verified from official government sources (myScheme.gov.in, gazettes). An autonomous AI Blog Engine generates plain-language citizen guides with verified official `.gov.in` citations.

[illegible]

Feature Module	User Value & Problem Solved	Technical Component & Architecture	Priority
Auto Scheme Ingestion	Citizens get instant access to newly launched state/central schemes without manual admin data entry.	Scheduled scraping worker + LLM parsing into PostgreSQL `yojana_schemes` table.	P1
Personalized Matcher	User inputs 5 attributes (State, Age, Income, Occupation, Category) → gets instant eligibility % score.	Dynamic Rule Evaluation Engine comparing user JSON profile against JSONB scheme rules.	P1
AI Citizen Blog Engine	Plain-language articles explaining scheme benefits, eligibility, and official links with visual cards.	Groq/Gemini LLM blog generator + custom image visual kit (`CategoryArt.tsx`).	P2
Application Guide Tracker	Step-by-step roadmap: documents required, fees, timelines, direct official portal links.	Shared `ServiceTracker.tsx` component + checklist state persisted in PostgreSQL.	P1
